Your child's safe and secure place in the Cloud to store and easily retrieve all of his or her important documents.

This system will:

- ⇒ empower your child to be able to access his or her information anywhere
- ⇒ provide a safe and long-term place to store documents after your child 'ages out'
- ⇒ have a permanent personal location so your child can always get the documents they need
- ⇒ help your child get a jump on the things they will need in the future
